

How Does Cybersecurity Impact Career Choices That Must Be Made Now?

The US President stated in his 2013 State of the Union Address that cybersecurity is the future of our national security and prosperity in this century. How does this impact career choices and decisions that a student must make now? Jim Cavanagh, Of Cyber Exercises, a very active member of the security community will provide insights and answer your questions in a very interactive one hour and fifteen minute session on Monday, October 28th.

Presenter: Jim Cavanagh

Even though Jim Cavanagh devotes the majority of his time to cybersecurity he still considers himself a technologist and network engineer with something to secure. His perspective has made all the difference in the world to enterprise, government and military clients from New Zealand and Australia to Kuwait and everything in between. He is the author or technical editor of almost two dozen books, the majority on cybersecurity topics. Jim is also known as the partner of the Technology Association of Georgia that pioneered the first open cybersecurity and business continuity simulation in February of 2013.
